A man with glasses, Francisco Guerra, is standing in a workshop filled with various tools and equipment. He is wearing a dark polo shirt. The workshop has shelves with boxes and tools, and a large fan is visible in the foreground.

EDITORS NOTES

FRANCISCO GUERRA
PRESIDENT | CEO

THE INTERVIEW

Tell me a bit about yourself.

I was born in Cuba and immigrated to the States when I was 5. At a young age there was an inclination to magic; illusions fascinated me. In my early 20's I invented a process of making it snow. This new technology was called evaporative snow. I formulated my first special effects factory called SnowMasters.

What is your company about?

For the past 20+years we've been designing special effects for the movie and special event industry. In our Northern Alabama R&D facility, we have been working on unusual new technologies. In addition we have continued to grow our business and diversify Guerra Holdings.

What is Guerra Holdings?

Guerra Holdings is a conglomerate of businesses that includes; military defense, capital management, digital media, product manufacturing, and product licensing.

What advice would you give to a young person with entrepreneurial ambitions?

Keep dreaming of ways to improve the way people do things. I have found that if something has never been done before, then I'd like to be the first. This attitude is needed when one wants to become an entrepreneur. Work hard; find advice you need from those who have made it. Be careful taking advice from those who have not made it. Finding advice from those who have made it is precisely what this blog is about and it's good to know that there are entrepreneurs who believe in the same practice. Should the need to have your head in corporate clouds arise, you'll now know where to look.

WE WORK SMART

A man with dark hair, wearing a red and white racing jacket and blue jeans, is sitting on a black Can-Am Spyder trike. He is looking towards the camera with a slight smile. The trike is parked on a paved surface, and the background shows a grassy field and trees under a cloudy sky. The text "WE WORK SMART" is overlaid on the left side of the image in large, white, bold letters. A red horizontal bar is positioned below the word "SMART".

MED AIR SOLUTIONS 400 BENEFITS & FEATURES:

1. Uses ViraTech© Air Purification Technology.
2. Patented, FDA cleared kill-chamber technology, kills bacteria, viruses and reduces all types of indoor air pollution.
3. Cleans the air up to 8x per hour, utilizing 48" of hi-intensity germicidal UV-lamps, with no ozone emissions.
4. Unit effectiveness stays constant, while most HEPA filter units lose effectiveness daily, and can cause sickness if not changed at regular intervals.
5. Clinical studies have shown direct health links with Indoor Air Pollution and sleep problems, respiratory issues such as asthma and allergies, along with increased risks of stroke, diabetes and cancer.
6. Virtually maintenance-free, filter-less technology covers spaces up to 800 sq. Ft, several times the coverage of many competing products.
7. Simple and easy to use. Plug it in, turn it on and it goes to work. No special wiring needed.

"THE NEW ROOF IN CAN" *Since 1926*

SOMAY
LEARN MORE

STRIPERS CHOICE
TRAFFIC PAINT
STATE/FED. AIRPORT SPECS

STERI-SHIELD
FUNGISTATIC PAINT

Since 1926 SOMAY has been a leader in water proofing, as well as concrete floor & specialty coatings for the interior and exterior not to mention traffic safety marking paints, primers, undercoat sealers and UNDERWATER PAINTS.

Over the years, SOMAY has grown as a roof coating manufacturer and developed into a pioneer and leader in the waterproofing and paint industry. SOMAY developed the first mass produced and mass marketed so- called "latex" paints, which are waterborne, and thus easy to use paint for interior and exterior walls of residences, with easy clean-up using just soap and water. For many years, SOMAY's principal customer for these new products was Sears, Roebucks & Co.

Since the late 1980s and early 1990s SOMAY has received kudos from around the world for its unique 100% solids, polyamine epoxy coating, SOMA/ Underwater technologies "HyCOTE" 151, a paint which can be used effectively underwater on such surfaces as US Navy and Coast Guard vessels, major petroleum offshore oil production platforms, pipelines, shipping docks and piers, even the Panama Canal. It is the only product in the world which has US Navy approval for application underwater to US Navy vessels.

SOMAY's latest pioneering efforts have resulted in introduction and commercialization in the late 1990s and early 2000s of SOMAY "STERI-SHIELD" Fungistatic Paint tested and proven by independent laboratories to be the most effective paint available for use by homeowners as well as institutional, commercial and industrial property maintenance professionals to resist the growth of harmful mold, mildew fungus and bacteria on the " STERI-SHIELD" paint surface.

Now, after more than three-quarters of a century as an industry leading paint and roof coating manufacturer that has helped to protect, preserve and beautify property, SOMAY continues to work with customers from around the world helping to make our world a better, more attractive place to live.
